## Projects

**ProjectName: Task Manager** [Live](#) [Github](#)

**Details:** The Best Task Management Website for Your Daily Tasks.

- Users can log in or register an account via Google or email and password, ensuring a secure and personalized experience.
- Users can post tasks with detailed information, including task title, description, due date, and priority level. This feature enhances task organization and clarity.
- User can see their posted Tasks in My Tasks section. In the task card, users can access comprehensive details about each task. This includes the ability to update task information, delete tasks, or mark tasks as complete.

**Technologies:** React | React-Redux | Redux-Toolkit | Tailwind | Firebase | Node js | Express Js | MongoDB | Railway

**ProjectName: Gadget Trade Hub** [Live](#) [Github](#)

**Details:** A React JS Website facilitating commerce interaction between buyers and sellers.

- Secure multiplatform authentication using google, github and email password via firebase.
- Users have the option to create either a buyer or seller account, tailoring the platform to their specific needs. Sellers can post their products and Buyers can seamlessly book the products.
- Users can also report the products and Admins can manage reported products by reviewing and taking appropriate actions. Admin can also verify the sellers.

**Technologies:** React | React-Router | Firebase | Node Js | Express Js | MongoDB | Vercel | Stripe Payment | Tailwind

**ProjectName: Ahmed's Photography** [Live](#) [Github](#)

**Details:** A Dedicated Photographer's Photography Service Provider Website.

- Users can securely sign in with google and email password.
- Users can see the photography services provided and book them. They can see their booking services in the dashboard route.
- Clients can make secure payments for their booked services using the integrated Stripe payment system. After receiving the photography service, clients can provide feedback by adding reviews to share their experience

**Technologies:** React | React router | Tailwind | Firebase | Express Js | MongoDB | Vercel
